The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Stein.

Stein discloses molding compositions comprising UHMW polyethylene particles and polyethylene wax wherein the wax is present in amounts of 5-60%. The particle size for the UHMW polyethylene particles as described in claim 1 of the reference is seen as meeting applicants' limitation to "no greater than about 40 mesh". UHMW polyethylene with molecular weights such as taught by the reference are well known to have melt flow indices near zero and, therefore, are seen as inherently meeting applicants' claimed limitation of melt index.

Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-13 are allowed.
